RINGCENTRAL ROOMS: SETTING UP THE POLY STUDIO X50

RingCentral Rooms combine software with hardware solutions to provide easier deployments and high-quality video conferencing experience. This guide provides an overview of the basic setup of the Poly Studio X50 for RingCentral Rooms.

POLY STUDIO X50 PARTS AND ACCESSORIES

The Poly Studio X50 ships with the following parts and accessories:

A. Poly Studio X50 video bar
B. Magnetic lens cap
C. Power supply and cable
D. Wall mount
E. LAN cable
F. HDMI cable (2 pcs.)

Note: An optional table stand or VESA mount can be ordered separately.

POLY STUDIO X50 BASIC SETUP

Follow these steps to complete the physical setup of the Poly Studio X50:

1. Connect the **LAN cable (E)** from your network to the **LAN port (c)**.
2. Connect both **HDMI cables (F)** from your TVs/monitors to **HDMI out ports 1 (a) and 2 (b)** when using dual TVs/monitors. Otherwise, you can use **HDMI Out port 1 (a)** to connect a single TV/monitor.
3. Connect the **power supply cable (C)** to the **power port (c)**.
4. Install the **Wall mount (D)** to the **TV mount bracket (d)** using the included screws.
5. Mount the Poly Studio X50 to the appropriate location on your wall.

This completes the initial setup of the Poly Studio X50. Upon boot-up, you are asked to register the device with Poly. You can start the registration process by scanning the QR code displayed on your TV/monitor or by visiting the listed URL.

After you have successfully registered your Poly Studio X50, the TV/monitor displays a pairing code to use on your Poly TC8 Room Controller to complete the sign-in process.

Note: You may be prompted to update your software upon boot-up, follow the prompts to complete the update and the system will display the pairing code after it reboots.
